Hi!

I write to show my objection to the proposals for development in Warrington which have given rise to the need for a local plan.

I do not believe there is a proven need to the amount of housing you say and am curious to know where jobs, schools, roads and services will come from to support the developments.

There is no evidence that the people of Warrington want it to become a city.

Once sacrificed, green belt land cannot be regained. This has already been hugely eroded in Lymm and area over the last 50 years and I feel we are in serious danger of completely changing our area to part of an urban sprawl. Clearly there are many parties who stand to gain enormously from this level of housing development and they have deep pockets and hence loud voices. You are about to destroy the countryside for future generations and make a few people very rich!

I would like you to justify the plan far more comprehensively and clearly and publicly than to date.

Regards
