To whom it may concern,

I am hereby voicing my concerns and protest about the proposed development plans for south Warrington.

I am mainly concerned about increased volumes of traffic in the Warrington area when we already have a large problem with air borne pollution from car emissions adding to chest complaints and early deaths.

Road infrastructure is already under pressure and there are frequent traffic jams when there are problems on the motorway.

Green belt land can never be restored to its former wildlife-supporting capacity once it has been built on.

Please reconsider your proposals for South Warrington before making any firm decisions.

Yours sincerely,
