Preferred Development Option Consultation

I write to strongly object to all the plans to develop the land for housing around Croft within the current greenbelt.

All I have seen within the plans by the proposed builders and land owners is with complete prejudice and without looking at all of the downsides to developing on the current greenbelt. There are far too many negatives to outweigh any positives and please let me have any relevant official form to list these objections to you.

As an example I am aware that we have some recorded evidence of endangered species within the current greenbelt and this must be preserved at all costs.

Regards
