

Dear Sirs.

Re : Local Plan Preferred Development Option

I write to you to protest at the size, scale, and even the very ideas behind the above plan which together with very many other people in the town see as a road to the ruination of Warrington and it's southern environs. Although denied, this project is perceived as a stepping stone on the path to the expansion of Warrington to achieve city status harboured by some. NO THANK YOU.

Every facet of this option seems to beggar belief. Projected housing volumes and associated services, industrial requirements, road traffic proposals, further loss of precious green belt etc etc.

I have a suggestion to make. If the time and money is available to spend on outrageous plans like this, why not spend it on putting the the many existing things wrong with the town right.....relieving traffic congestion, improving the core of the town (and I don't mean more pubs, clubs, eateries and other gaudy establishments), filling the empty shops which appear to be increasing (and I don't mean just small businesses either), I am also aware that the many other parts of the Warrington infrastructure could also do with help i.e. medical services, schools etc etc.
