

Dear Sir.

Regarding Warrington Borough Councils Proposed Development.

I wish to object to these proposals, on the grounds that I have lived in Moore  and came for the rural setting, and atmosphere.  I enjoy and engage with the wildlife around here. I've always had a big interest in the nature reserve....bird watching, watching the various wild animals, 

The agricultural land should be used for agriculture, not development. We are told the population is increasing....how will we feed them if the land has been developed. The brownfield sites should be used 1<sup>st</sup>. There will not be a green space between Warrington and Runcorn if this development goes ahead. The lanes are used by cyclists, walkers, runners and there are a lot of horses and liveries in the village.

Port Warrington is not up and running. Why the need for warehousing?   
 it will impact on us in terms of traffic and noise, 24hours a day, 7 days a week.....this is how ports work. They are not part time. The roads round here can't take the increase of traffic due to warehousing and development.

The character of this area will be totally changed. I agree with change, but not in this way.

I urge the council to re-think their plans, and listen to the local people.
