

Good Morning,

This note is to inform you that I have read the above and attended the presentation at the Park Royal Hotel and that I am completely opposed to the proposals. Please add my name to the list of dissenters. The reasons for my opposition are :-

- 1) Warrington has been subject to large scale building programmes over the past 25 years and its greenbelt is in short supply and requires protection. We should not build on the greenbelt.
- 2) To envisage the building of housing and businesses on the scale recommended is lunacy when we consider the poor road system and the resulting congestion that Warrington people endure. At the present time accidents on the M6 are occurring frequently and the traffic is being diverted through the Warrington centre creating gridlock. Consider the ensuing problems with more housing and more cars on the roads. Travelling through Stockton Heath would become a nightmare.
- 3) Warrington has done more than its fair share over the years in providing houses for those who want to live here and other towns should share the need for housebuilding. It is no good just saying that people want to live here. I would like to live at Sandbanks near Poole, or London but I cannot do so because I cannot afford to.
- 4) The building of a new road along the line of the old railway is ridiculous. All this does is to move the traffic problem elsewhere and blight the homes in it's path without solving any problems.
- 5) Reading the PDO leads me to conclude that its objective is to support the desire of Warrington's hierarchy to achieve City status but we are not told what how this status will benefit the ordinary people of Warrington. It could be a disadvantage for us.

Yours sincerely
