

Dear Sirs

I have never needed to write a protest letter before, but having seen the detail of the decimation of Green Belt Land in South Warrington I feel I must express my views,

If the forecasted population growth is in the region of 22,000 why build 24,000 houses. It would appear every man woman and child would be eligible for a property. Half the numbers proposed would be more realistic. Surely all identified Brown Field Sites would need to be used up before ANY Green Field is considered.

The sites proposed already indicate that individual communities will become one large urban sprawl with the resultant loss of identity.

Traffic and pollution is already horrendous in the Stockton Heath area and more so on the A50 wherever there is the slightest incident on the Motorways and the introduction of Tolls on the Mersey crossings will bring more traffic to the Area now, that is before a single brick is laid.

Mention has been made of a Garden City it appears as though all of the proposed plans have been created with Warrington CITY in mind. So that the objective and if so why is that. We first need a Decent Town to be proud of before anything else should be considered
