Hello

I wish to make an objection to the Warrington Local Plan to build in excess of 7000 homes in South East Warrington and 1,800 new homes in Walton. This plan would triple the size of Walton and significantly reduce our green belt area.

This plan will introduce approximately 18,000 additional cars on our already busy and congested roads. I understand that there has not been a high level traffic survey and the impact on Stockton Heath village has not been considered.

This number of additional homes would also put a strain on our already stretched hospital capacity.

Please add my objection to the many others I'm sure you have received.
