To whom it may concern.

I have real concerns over the future planning as detailed in in the above mentioned development.

My main concerns are that there is no indicaton about future infrastructure to support the development, i.e. new roads, improved health services, schools etc.

The roads around this area are alrea busy especially during the rush hours and there are limited routes in and around these village areas already.

There is real pressure on the schools and health services who are already struggling to cope with demand.

Regards
