Subject: House in Croft application - Objection

To whom it my concern

I would like to take the opportunity to state that I am fully against any current and future planning applications for dwellings of 5 or more new houses.

Croft is a small village and I feel it does not have the infrastructure or amenities to support such a large influx of new house developments.

The roads are congested and in poor condition, public transport is limited and there insufficient services or shops.

I believe planning permission has not been formally requested yet, but can you please advise how my neighbors and I can be kept up to date of any progression with this request?

Kind Regards
