Comments: I am opposed to the proposed Developments at Moore Nature Reserve.
I am concerned that there has not been a pre-application public consultation about the proposed plans.
I use Moore Nature Reserve regularly to observe the birds and enjoy the diverse species of plants, animals, birds and other wildlife in the woodlands , meadows and wetlands. There are tawny owls, lesser spotted woodpeckers and a wealth of resident and seasonal species that would be affected by the loss of habitats. There appears to be no assessment of the impact of the plans on the parts of the reserve affected.
I fervently request that you make the time to discuss the implications for this important and much used site for wildlife with all stakeholders before any decisions are made.
