Subject: Application R18-081

You may recall we discussed the application you had received - R18-081 where my house and garden actually lie in the middle of the plot / application being put forward.

I have attached the map that was part of the application and shaded in my house and garden in red.

- our land / house is c2.5 acres. It was an old disused mechanical building until renovated into a house c10 years ago. There are no neighboring houses.

- our land consists of the house, gardens and woodlands containing abundant wildlife and a pond containing fish and newts.

Kind Regards
