Subject: Objections proposed 495 house development off red lane, Appleton. Planning numbers R18/105,R18/102,R18/103,R18/012

Dear sir/madam

I am writing with the following objections to the development proposal off Red Lane in Appleton.

Red lane bridge, which is single traffic,would become more congested.

Red lane width restriction would become extremely problematic

The traffic would increase on all the small local roads.

The 20 speed limit in these roads would be ignored by even more drivers.

The countryside would be impacted greatly and the local wildlife would suffer as a result.

The condition of the road surfaces around the site are terrible and would deteriorate.

The construction itself would create prolonged traffic chaos and distruption to locals quality of peace.

Flood plain will be concreted over.

There would be more pressure on local schools, medical centres and other amenities.

Please could you keep me abreast of any further developments regarding this and log my objections.

Your sincerely
