

[REDACTED]

---

Hi

Given the announcement from DCLG yesterday, and the amount of information / mis-information in circulation concerning the objectively assessed housing need for Warrington, could you please show the calculation for Warrington using the proposed DCLG formula?

I notice from their spreadsheet that the annual number for Warrington is 955 which is slightly lower than I was led to expect by the LP-PDO.

It would be helpful if the calculation could be made more widely available to ensure that consultation responses to us bear it in mind. Otherwise we will get a lot of "the numbers are wrong" or "the numbers are too high" responses which will, presumably simply have to be ignored, causing some irritation at best.

Best wishes
