To whom it my concern

I am writing to object to the proposed 24000 new houses bypass and western link.

I feel the new homes will result in more cars on the roads which will mean more congestion, noise pollution and air pollution. With Warrington having some of the worst air pollution in the north west the extra traffic will have an adverse affect on the environment.

In particular I have an objection to the western link the purpose of this bridge is to ease congestion in the town centre, but with all the new homes and extra cars I fail to see how this will ease any congestion.

Yours sincerely
