proposed MAIN ROAD along route of railway embankment through
latchford/grappenhall, thewall AREA GRAPPENHALL

i am appalled that the grappenhall residents have not been consulted regards the above development. i demand a local consultation event be held in grappenhall with all relevant paper copies provided to view. i do not want this road to go ahead..i do not wish to look at a concrete embarkment, or my house to be demolished or my garden diminished. i live in a greenbelt area and it should therefore remain that. my family are asthmatics and the pollution from the road will be highly infectious and cause breathing difficulties for us all. i wish to see full plans of what wbc intend to do and not just sketchy rushed through plans - not even informing the local communities who will be effected.. please arrange a meeting in the local area with full disclosure of what is intended to be built. how come we have had no letters from wbc informing us of the 8 week consultation period so we could actually voice our opinions. i request a time extention to the 8 weeks so that the areas which will be effected can be provided with all the relevant plans at a information roadshow and we can therefore see what is intended to be done. full disclosure is needed.

yours disappointingly
