Comments: Appalled at this possibility. Traffic and pollution implications horrendous. Stockton Heath and surrounding area becomes gridlock if swing bridges go off or if there are problems on nearby motorways as things are now.
Impact on GP and school facilities?.....
Loss of green spaces with yet more urban sprawl is not good for life quality.
The loss of prime farmland has already compromised this country's ability to feed itself in the event of global disruption.
Impact on wildlife and environment will be awful.

Subject: Warrington local plan for south Warrington

This plan is appalling.

The definition of green belt is to control urban sprawl and to protect open spaces for the benefit of the human population and wildlife.

People need green spaces and the quality of life for ALL is made better by them.

Greedy and unscrupulous developers are desperate to get their hands on prime green belt land in south Warrington for one reason and one reason only MONEY. Any brown field sites just don't give them the same amount of profit.

They couldn't care less about the traffic and services mayhem that would be caused as long as they can make as much MONEY, MONEY, MONEY as possible.

Have you been on the Stockton Heath A49 in rush hours ?? and then when the swing bridges go off or there is an accident on one of the nearby motorways their is TOTAL gridlock and all the surrounding street become full of angry motorists trying to find rat runs but getting nowhere.

Its awful to be in the middle of it, [REDACTED] and the incidents of road rage are frightening.

You must realise the catastrophe that tens of thousands more cars would be!

But do you care? I doubt it and it makes me angry and frustrated trying to figure out why .

I do not believe the projections of housing requirements. I believe that they are manipulated by the people who stand to make MONEY out of it.

Also, all housing going up in this area seem to be luxury houses, certainly not aimed at affordable housing for young people.

I am becoming more and more cynical about housing developments and believe that greed and corruption play a big part in them.
