**Subject:** Proposed housing development off red lane Appleton

I would like to strongly oppose this development project the surrounding area is not suitable for this kind of project the road system would not cope and the red lane bridge would be open to collapse traffic problems are already at full capacity now adding over 900 more vehicles in this area would be catastrophic not to mention dangerous. beside this there is the wildlife and nature side of this it would devastating for the local wildlife. What would happen to the bridleway/footpath that is used by many local families it just does not make any sense and I hope common sense is applied here and this project be declined.

Kind Regards
