---

Dear Sirs,

Our only concern is the plans to use the old railway embankment as a dual carriageway.

We think that :-

Our health would be badly affected by the exhaust fumes, it has been established that the particulate pollution from roadways is a major cause of ill health

The road would be the main artery from Warrington to the motorway ie a lot of heavy traffic, so the noise pollution would continue 24/7 affecting sleep and relaxation, as our property is about 5 feet from the embankment. Privacy would no longer be possible with buses passing within a few feet of the building.

As well as the noise the vibrations of the heavy vehicles could cause structural damage to the property

All of the above strongly devalues our property in which we invested our life savings with a view to passing it on to our family. Even the possibility of selling is now out of the question as nobody in their right mind would buy a flat within 5 yards of a main artery. Now that plans are in effect, anybody buying would be told by their solicitor of the development and the possibility of the property becoming part of a compulsory purchase order.

In addition the actual construction of the roadway will cause will be a major physical and mental health concern due to noise and pollution
