Subject: Preferred Development Option

Dear Sir/Madam

I just wanted to add my views on the Preferred Development Option, as proposed in South Warrington. I live with my family [REDACTED] in Grappenhall, and I am very worried about the proposed new road on the site of the old railway bridge. Our house is situated approximately [REDACTED] away from the railway bridge, and I am most concerned about how a new road would affect ourselves, and other residents on the avenue. The noise and disruption of having a new road built would be bad enough, but to then have a main road in operation metres away from our house would be terrible, taking into account the noise and pollution, and would completely change the character of the avenue. This is if ourselves and our neighbours are able to stay in our houses, and are not forced to move, so the houses can be demolished to make way for this road.

When I bought this house with my husband [REDACTED] years ago, we were attracted to [REDACTED] because of its quietness, and the fact that it wasn't a through road, making it safe for children and pets. As already stated, all these qualities would be greatly diminished if a main road were built at the end of the avenue. The old railway embankment is also home to foxes, and other wildlife, and as an animal lover I worry about what will happen to them. If we were forced to move from our house, I also fear that the new road would affect the value of the house.

I hope that you will take my views into account when making the decision on the new road. I know that there is strong feeling from many people in Grappenhall and South Warrington about these proposals, so hopefully local people will be listened to when making any decisions on the Preferred Development Plan.

Yours faithfully

[REDACTED]
