This email is sent to you on the 26th September 2017 to strongly object to the local plans for Warrington as I firmly believe it will be a change for the worse....we already struggle with ever increasing traffic through Stockton Heath, medical centres are at bursting point schools struggle to cope with today's demands and our local hospital Warrington is constantly under siege trying to cope with an ever growing population but also close to my heart. and very important, and the main reason for my email, is the green belt area which is also under threat.....this is our lifeline, its where the people of Warrington love to go for walks to recharge their batteries, its where numerous numbers of a variety of wildlife struggle to survive in whats left of their habitatswe owe it to our children, grandchildren and our descendants in the future to fight to keep these green belt areas and I expect the people that I trusted my vote to, to respect the wishes of those who are totally against these plans and to fight alongside us to save the green belt. You would be destroying centuries of green belt areas and once gone they can never be replaced....as for city status I say NO WAY we were a market town and that is how we should stay we need the green belt barriers between us Liverpool and Manchester to stay that way A GREEN BELT...do not jeopardise the health and well being of Warringtonians by destroying areas of natural beauty you have plenty of buildings already standing that you could convert into apartments, particularly in the town centre, start on them instead of leaving them all half empty and instead of encouraging retail units on the fringe of the town build houses instead because each time you put retail on the fringe of the town, you take away the footfall from the centre of the town which is already fast turning into a ghost town now I call that bad planning I AM TOTALLY OPPOSED TO BUILDING ON THE GREEN BELT AND I WILL FIGHT EVERY STEP OF THE WAY TO PROTECT IT.....
