

[REDACTED]

I am writing with my objections to the proposed development plan. My husband has submitted his concerns and I second every one of them. To name but a few.....

The cost of building the new development, given the need to issue compulsory purchase orders, the cost of the new high level crossing, is not commensurate to the gain, in any way shape or form.

My children will be going to school in Grappenhall. If we were to receive a CPO this would mean leaving the area and having to pull them out of school. What about continuity of education? This will surely have a detrimental effect on them and their education.

Air pollution- whilst the majority of Warrington has good air quality there are areas close to major roads where the levels of nitrogen dioxide are high and exceed national standards. What is being done to address this and ensure and future development will not contribute to this further.

The value of our property will take a nose dive should we not be the subject of a CPO due to having a bypass/new road in our back garden.

We often have bats flying in our garden, what is being done to conserve them and protect the wildlife on the TPT

If we are not subject to a CPO what will be done to address the fact that we already have a [REDACTED] [REDACTED] the road will force us to move yet our house will be devalued due to the road

Brown field sites should be exhausted before any building is permitted on the green belt

My husband has detailed our points further in his objection and as stated above I second them and more
