

I strongly object to the proposed new link road on a number of issues.

The purpose of the road is supposed to reduce traffic, once all the houses and industrial areas are complete it will obviously generate far more traffic and with it more congestion than ever.

Warrington already had a poor record for air quality, the additional traffic this road will bring will be detrimental to health.

Noise, I live within 200 meters of the proposed road, it will be high up when outside my house, the noise is going to be horrendous.

Environment, once Peel holdings develop port warrington off the back of this proposal the effect on Moore nature reserve will be catastrophic, if indeed it survives at all.

I can't believe the deceit the council has used to try to make people believe this is to reduce traffic congestion.

The proposal should be

withdrawn on that basis alone.
