>> To whom it may concern,

>> Please register this email as notice of my complete and absolute objection to every aspect of the latest development plan for Warrington South. The scale of the intended development is so large no additional infrastructure how ever comprehensive would be able to cope with the additional requirements generated by it. Traffic volumes are chaotic at peak periods and whenever there is an issue with any of the motorways add any of the canal bridges opening and total gridlock worse than now would ensue regularly !!

>> Everything put on hold for a further 12 months and a evidence based factual report/ consultation backed up with a scaled down plan with guaranteed new infrastructure projects ie New schools/ medical practices and road layouts paid for solely by developers and legally binding on them would be the only option Acceptable by Myself.

>> Yours Sincerely
