The planning team wbc

This email is to oppose the development in south Warrington of thousands of houses, warehouses and roads on green belt land. I feel the proposal of such a huge development is unrealistic, I understand the need for more housing but there is still available brown field sites.

The roads at the moment can not cope with the traffic, even if it was improved considerably they would only be adequate to cope when the M62, M6 and the M56 which have their regular accidents and puts Warrington areas to a stand still. If thousands more vehicles were put into the mix this would create havoc! For safety reasons this must be stopped!

The loss of the fields is unthinkable, they are needed for crops which in turn help with drainage as the flood water needs to go somewhere. The loss in habitat for the wildlife would also be detrimental.

Warrington is one of the most polluted areas in the country, why add more pollution that will add strain to the NHS as a result from air pollution etc. ?

Who is funding the cost of all the compulsory purchases ?

Who is funding the cost of the new road and housing developments?

Warrington Hospital can not not cope now, what happens with all the new influx of people?

I have lived in this area all my life and feel the proposed plan is unrealistic and unjustified. If all this proposal goes ahead I will be leaving my home town for a better quality of life, I'm sure others will be doing the same. Warrington is a town not a city, will the town folk be listened to or ignored?

Please reply to my questions

Regards
