I object to the proposal of a strategic road running over Weaste Lane and down the transpennine trail.

I object to the release of green belt land for building houses and roads. This area is a host to much wildlife including buzzards, several species of owls, kestrels, bats. If this area is taken then they will be a great loss.

This land is not spare but supports existing working farms .

A garden city will destroy the area and the new housing population will create even more intense traffic congestion and pollution throughout the town.

The surrounding roads cannot take the extra amount of traffic .Warrington, Lymm ,Thelwall, Warburton already comes to a gridlock when there is any problem on the M6 / road bridge being lifted for ships along the ship canal.

There should be a further ring road bypassing Warrington before even considering any new housing developments.

Without the right infrastructure, no new community will thrive and exisiting communities will not welcome new housing if it places further strain on already stretched local resources. We cannot cope with the current demand on our health and community services .

The planners are taking the easy option of destroying the green belt for future generations because this land will be attractive to large building contractors who will make massive profits.
