Dear Sir, Madam

I have submitted the response form but wish in addition to provide the following additional commentary in objection to your proposed development in and around Winwick and surrounding areas.

The matter for concern is the scale of the proposed development around our surrounding area, (Winwick) including the impact of Parkside regeneration. A potential huge bearing on Winwick and our neighbourhood villages. No doubt if these schemes go ahead the effect will be detrimental and it will be too late to look back and object.

Our local roads are already under pressure, it takes one bump for the whole of the A49 and roads around/surrounding area to be at a standstill. Increased cars and lorries can only exacerbate a fragile situation. Increased pressure on our services, amenities and infrastructure. Those who can get medical appointments, places at local schools easily, ride bikes safely on our roads (the list goes on) are fortunate but not always my experience currently. What about protecting our greenbelt and safeguarding what countryside we do have around us plus maintaining the historic character of our local villages Winwick, Burtonwood and neighbouring town Newton le Willows, the impact of which is increasing. I'm very sceptical about the background of true economic development, and City status, sorry no!! !

Please can you provide an acknowledgement.

Kind regards
