

[REDACTED]

---

Dear Sirs,

I recently attended the Park Royal presentation of the WBC Development Plans and wish to express my concern at a number of the proposals.

I have lived in Grappenhall for some [REDACTED] years and am alarmed at some aspects of the development plan which would result in changes to the environment and our way of life. There are many points that could be raised, but I would just mention-

1. The developments planned for the green belt areas in Grappenhall and the effect on the old village. Surely consideration should be given to utilisation of brown field sites which exist elsewhere.

2. The possible major new road across the Ship Canal with its effect on existing housing and high increase in traffic flow.

3. Stockton Lane becoming a bus route. To where? It cannot exit the village under present conditions via the weight restricted hump back bridges.

There are many other factors which could be highlighted, but I would just ask that you please, please think again, so that we can be spared such blights on our neighbourhoods.

Yours faithfully,

[REDACTED]
