

Hello

I have been an Appleton resident for [REDACTED] years, living close to Longwood Road, prior to that I was born in Grappenhall and lived for [REDACTED] years in Lymm.

My concerns

- **Stockton Heath, with parking already at saturation point**
- **Any problems on the nearby motorways immediately affects the surrounding area, London Road often at standstill**
- **Saturation levels for the local Doctors**
- **Proposed building on green belt land**
- **With us leaving the EU, consideration should be given to using the existing agricultural land for growing crops and livestock**
- **Concerns for air pollution from the increase in traffic, diesels are not going away overnight and electric cars will need to obtain electricity from extra sources? There have been many studies on the detrimental effects of traffic fumes on children's brains.**

- **I do not want to live in a city for many of the reasons mentioned above, does adding 'garden' to it make it more acceptable?**
