

[REDACTED]

---

[REDACTED] I would like my objections to be heard regarding the proposed plans.

- 1) Use of Green Belt land: I understood that Green Belt land is not used for development when there are alternative brown field sites available. What are the reasons for using green belt when there is brown belt land such as Fiddler's Ferry that could be used for development?
- 2) Loss of beautiful sites for recreational activities: we use the trans pennine way regularly for exercise and outdoor activities as a family. These are established beautiful areas that should not be destroyed.
- 3) Air quality and pollution: as I understand it, Warrington is not a good environment regarding air quality. I am concerned the level of building activity, increased road activity and loss of green Belt /recreational areas will have a further negative impact on the area and it's environmental quality.
- 4) Transparency: please can you make clear who makes the final decisions regarding the plans and how they can demonstrate impartiality.
- 5) Who developed these plans and the transparency of the preferred options: please can we be informed how these plans were devised. I am unsure how when " no significant issues were raised " who was asked about these issues. I feel there are many issues that need to be raised.

These points are in no particular order but each are of concern to me as a resident and employee of Warrington.

Kind regards,

[REDACTED]
