Notes:

Housing Delivery Test: 2019 consequences are concurrent (i.e. where the buffer applies, the action plan also applies)

Isles of Scilly and Barrow-in-Furness have zero final housing requirement due to negative household growth projections. Therefore they do not have a Housing Delivery Test: 2019 measurement.

All results have been calculated in line with the Housing Delivery Test: 2019 measure [INSERT LINK HERE](#)

Housing requirement and homes delivered figures have been rounded to the nearest one decimal place in this spreadsheet. Unrounded figures have been used to calculate the HDT 2019 measurement figure.

Therefore the percentages shown may be different to a calculation using the number of homes required and the number of homes delivered in this table. These have been included for context only.

The final Housing Delivery Test 2019 measurement result has been rounded to the nearest 1%.

Values for each authority in a joint plan being measured jointly refer to the whole joint plan area.

For recently reorganised local authorities, the Housing Delivery Test is based on predecessor authority boundaries for the first year following reorganisation. More details are available in planning practice guidance: <https://www.gov.uk/guidance/housing-supply-and-delivery>
