**Subject:** Railway Embankment Road proposal

Dear Sir/Madam,

We write regarding the proposal to build a new road along the railway embankment in Warrington. We strongly oppose this proposal as we believe that there are sufficient roads and traffic in Warrington already. The addition of another road and traffic would lead to a lot more pollution and noise. This is something Warrington should be aiming to move away from

The embankment is currently an essential green corridor for wildlife including badgers, foxes and birds. We need to look after our wildlife. You could maybe create a cycle or walking path along the embankment instead. Please protect our environment.

Please give our comments all due consideration.

With thanks.
