Subject: Objections proposed 495 house development off red lane, Appleton.

Dear sir/madam

I am writing with the following objections to the development proposal off Red Lane in Appleton.

Red lane bridge would become more congested.

Red lane width restriction would become extremely problematic

The traffic would increase on all the small local roads.

The 20 speed limit in these roads would be ignored by even more drivers.

The countryside would be impacted greatly and the local wildlife would suffer as a result.

The condition of the road surfaces around the site are terrible and would deteriorate.

The construction itself would create prolonged traffic chaos and disruption to locals quality of peace.

The flood plain would be concreted over.

Local amenities, schools and medical services would come under great pressure from the large increase population.

Please could you log my objections keep me abreast of any further developments.

Yours sincerely
