---

In response to council development, I cant believe councillors can come up with these ill conceived ideas without any consideration for existing residents who already have problems moving around the area. We have regular gridlocks on M6 +M56 Motorways in Warrington, Stockton Heath, London road, and surrounding areas without even the thought of the extra traffic these new houses would generate. These ideas are railroaded thru without any thought for existing residents. What about the consequences, doesn't that come in to it ?

Health. Also without a thought for all the new Doctors etc that would be needed for all these extra people. With the NHS running at capacity where are all the services going to come from for the 55,000 extra residents in the area?

All these Labour Executive plans are purely to facilitate Warrington to City Status on the backs of south Warrington residents. Which sounds, and is ridiculous.

Well listen Labour Executive members, who ASKED US ? This massive increase in the size of the town (which incidentally hardly effects Labour held north wards) just to achieve City Status is not wanted ! [REDACTED]
