

[REDACTED]

Hello,

I want to tell you how strongly I oppose the proposed plan for warrington south. It will completely change our village way of life that is so important in south warrington. You know this yourselves as shown in the original plans not to use any green belt land.

It is so clear that the overriding factor in all this is money to the detriment of our local communities and people's way of life.

The impact upon our area for generations to come will be overwhelmingly negative. Taking our green belt can not be allowed to happen.

I call upon the council to stand up against this government and represent each and every person in south warrington.

I tell you now that if you build 20,000 plus homes in south warrington then not only do you destroy the beautiful village communities but also send Thelwall and parts of Grappenhall into a river.

The Manchester ship canal has been close before to overflowing in this area as well as drains unable to cope with flooding. I guarantee parts of Thelwall will go under water.

Ripping out houses in the heart of Grappenhall. Uprooting families. Destroying the beautiful trans pennines trail.

I insist that the council stand and fight against the government, and let's be honest big business, and insist as per your original proposal not to touch our beloved green belt and in turn our way of life.

Please show the good people of warrington that you are willing to stand up for the little man.....please.

Yours,

A very concerned resident of south warrington. I love WA4.
