

Hello,

I have a question about building on the greenbelt land in burtonwood and surrounding areas, opposed to building on brownfield?

Firstly, how is this acceptable to build on greenbelt in itself? Im aware there is a need for housing - but why green belt?

This also opens up the question of what is stopping joe blogs building on his green belt field to make money when the council are?

I would appreciate more information on this as a resident I strongly oppose this

Thank you
