Dear Council / Local plan administrators

I would like to voice our opposition in regards to the local plan in the area which we live and within 3 miles radius. Myself having been a [REDACTED] areas for [REDACTED] years I can see it wouldn't be sustainable to build so many new houses in my local area without adequate road networks and infrastructure such as schools and more parking at local centers that is just not there and is not deliverable without a large amount disruption to local residents such as our selves in the area . In my area if peel hall park/satnam site was to be turned into a housing development it would mean removal of our free space and push us closer to an urban environment that many people like our family have moved to the area to avoid . For example 1000+ more vehicles in the area causing pollution that could affect my child's future health 1000+ more child places for schools 1000+ more bins to empty and put in landfill ..... I could go on basically it seems that warrington borough council care more about money and gain with big business than the people of warringtons well being .I believe that peelhall park and the satnam site provides an ecological sink for the pollution from the m62 which is important for air quality in warrington generally , winick road , winick, houghton green, fearnhead and orford . It is an important place that should be preserved a place for people to walk in nature promoting health and well being in peace and more importantly it wouldnt exist without the eco system and all the plants and creatures that live within it . This is what makes it unique something for the future generations to enjoy .

I would expect a reply but I have little hope thank you christopher bate
