I tried using the link and looked on the WBC website but to no avail. A friend gave me this email address.

I just wanted to say that with all of the domestic and industrial building, spare land will be reduced and I thought that Warrington needs a new hospital and there are fewer and fewer options for a hospital site as more building continues. Kendrick Wing has been closed for over a year due to two fires, the wing has been poorly maintained and the rest of the hospital is old.

Also, Bridge Street mostly towards the Mersey Street end needs looking at. It is mainly bars and late night food outlets and The Packet House has been closed and neglected for many years.

It's ok building houses but Warrington will also need schools, doctors, local shops etc to support these new housing estates.

Thanks
Liz Helsby
