

June 9th 2019.

Dear Sirs,

Local Plan and Transport  
Plan: LPT4

I write in connection with the above

I attended the public consultation  
at the Walswell Jones Stadium, the  
scale of which is astonishing

As I see it the Plan is too  
ambitious, not enough consideration  
is being given to using brownfield  
sites for housing, and what are  
the special circumstances to  
allow precious green belt being  
taken, with loss of habitat for  
our wildlife?

We know houses will have to

PTO

2.

be built, but why not spread it more evenly across Warrington, we do not need or want a garden suburb of this size in South Warrington.

The Homes would not be affordable for any employees of the new Industrial Estates proposed, i.e. Eddie Stobarts and 6/56. they will be for people who will have to commute using the existing congested roads to travel, no plans seen to be in place for improving the road network, we are still dependent on 3 Victorian Swing Bridges, 2 instances recently of the Bridges being stuck, due to age and lack of maintenance.

The character of our villages

3.

will be lost for ever', green spaces are vital for health and wellbeing, much is written nowadays about this, we need to preserve our Green Belt for future generations to be able to enjoy the open air. Air pollution would be damaged still further with the arrival of yet more vehicles.

Please think very carefully as the decisions you make will affect our town for years to come and once Green Belt is lost it is gone forever

Thanking you.

Yours faithfully,

Mrs Marjorie H. Gule

The first part of the document discusses the importance of maintaining accurate records. It emphasizes that proper record-keeping is essential for ensuring the integrity and reliability of the data collected. This section also outlines the various methods used to collect and analyze the data, highlighting the challenges faced during the process.

The second part of the document provides a detailed description of the experimental setup. It includes information about the equipment used, the procedures followed, and the conditions under which the data was collected. This section is crucial for understanding the context and limitations of the study.

The third part of the document presents the results of the study. It includes a series of tables and graphs that illustrate the findings. The data shows a clear trend, indicating that the variables studied are significantly related. The analysis also identifies the factors that influence the results, providing valuable insights into the underlying mechanisms.

Finally, the document concludes with a summary of the key findings and their implications. It discusses the potential applications of the research and offers suggestions for future studies. The overall goal is to provide a comprehensive overview of the work and its contribution to the field.
