

16th June 2019

To: Warrington Borough Council

Dear Sir / Madam

Warrington Local Plan 2017 - 2037

As a young citizen of Warrington, I am very concerned about the environment in which I live. I am particularly worried about the impact on my, and my communities, health from the increasing pollution from traffic emissions and the worsening air quality.

I am aware that your Plan proposes to build up to 20,000 more homes in Warrington over the next 20 years. According to Statista, (North West, UK 2017) in 2017 data, the average number of cars is already 1.2 per household, and even higher in more affluent areas. I can't imagine how many cars (and therefore increased traffic and air pollution) these

20,000 new homes, plus all the existing homes, will have in the next 20 years!

As a young resident, and committed to the town I care about, I want you to listen to and take note of the concerns that me and my generation have.

It's our future, our environment, and our quality of the air we breathe.

Yours faithfully

[REDACTED]
