Re. Proposed Local Plan for Warrington.

We wish to comment on the above issues,

Lymm residents are only too aware of the pollution from vehicles on the motorway system here, and the close -by Manchester, Barton and Liverpool Airports, and to a lesser degree – Trafford Park. Those who are experts on the subject of pollution are all agreed that the least we can do to counteract this problem is to surround these areas with trees and open spaces, as a small step forward. It does not make any sense at all therefore , to ignore this advice, by continually building on the open spaces which are meant to protect us all.

On the subject of new-builds, we have had more than a fair share of domestic dwellings in recent times. We do not want to end up with bricks and concrete for miles, which is precisely what will happen with constantly expanding borders.

Please prove to us that we are still a democracy, by carrying out the wishes of the people, for the people.

Thank you.
