

12th June 2019.

Borough Council to call Alan,
WBC.

New Town House.

Between Market Street.

WAIZHIT.

Sir,

I write regarding the local
Plan for new town which I consider NOT
to be sound, as the number of houses to be built
on green belt land is totally unacceptable.
What quality of life can anyone have with
this level of density.

As things stand at the moment, the existing
road network is unable to cope with the
volume of traffic - any more and there will
be a complete standstill adding to the already

high level of pollution.

As regards the proposed industrial sites, the current level of unemployment in the town is very low so personnel to fill these jobs are going to be travelling from elsewhere — more congestion.

It would appear that the aerial visibility of brown field sites has not been thoroughly investigated and so I urge the planners to think again about what is being proposed and allow Warringtonians to have some quality of life

yours faithfully

Patricia McDowell.
