Dear Council

I appreciate the many responsibilities of the Council-and the pressure they are under from Central Govt but they represent us - the ordinary people of Warrington in protecting the environment of the Borough and its residents including the most vulnerable .

1. The environment is already threatened by air pollution and increasing traffic. There is danger to both wild life and to the human population from increasing traffic pollution which contributes significantly to Global Warming. The Council surely recognise their responsibility to act reasonably in considering the number of new homes the area can ecologically sustain to retain a balance..

2. The Council should be independent in reaching a decision on behalf to its residents. This is not simply a selfish desire to protect what already exists but is a life and death concern for the future of the surrounding countryside and the health and well being of each member of the Community -particularly the vulnerable of the areas under consideration..

3. PLEASE act wisely and remember the fragile environment in considering the application for SUCH a huge increase in homes in this area. You have the trust and faith of the residents and their futures and those of their families in your hands

Yours Faithfully
Timothy Ardern
