Dear Sirs,

I would like to object to the proposed local plan LTP4.

I whole heartily object to destroying green belt especially when there is brownfield available.

I object to environmental impact this will have on our community. Warrington is already in breach of EU air pollution levels and has been sited as having some of the worst air pollution levels in the UK. These plans will significantly increase pollution levels. The proposals bring large increases of traffic into areas where Warrington residents live and raise their families. It is abhorrent that this plan will badly impact the lives and well being of the local population.

The plan fails to look towards a sustainable future and will greatly increase Warrington's environmental impact, whilst other council plans are paying much more heed to the climate emergency our council continues to fail to formally recognise this.

The transport plan is very shortsighted endangers the lives of residents through pollution levels. It endangers our children's future by failing to recognise the climate emergency and making Warrington's contribution to this much worse.

Spend some money and improve the land and support the drive to build the northern forest instead of this!

Your sincerely

Guy
