I oppose the local plan.

I want to live in a place that has fresh air to breath, not lots of lorries and busy roads. We learn all of the time at school about how we should be protecting our environment but these plans do not protect our environment they just destroy it. The companies are greedy and are more worried about money than the people who live here. The plans do not have enough detail and don;t include important information where land is available that could be used before our fields. The people planning this should watch movies like the Lorax because they are meant for children to learn about how greed can destroy the good things we have around us but it seems like grownups need to learn this as well.

Thank you

Jenny Smith
