We wish to protest in the strongest possible terms against the Local Plan which is unacceptale on many levels.

The number of houses proposed i.e.18 500 far exceeds the government guidelines. The infrastructure will not support such a large number. There will be a massive increase in traffic and there are no details available regarding new roads. Already the traffic congestion in this area is unacceptable. The environmental damage has not been taken into account.   Quite apart from air pollution the whole character of this attractive area will change and not for the better. The villages will disappear into an urban sprawl. This must not be allowed to happen. Please think again!

John and Patricia Renwick
