Government Inspectorate

Dear Sirs,

Following the recent announcement of the potential availability of Fiddlers Ferry (on the West side of Warrington,) as a possible brown field build site I would urge you to investigate this as a much more sound choice of viable land for commercial premises rather than building these premises on Green Belt in green rural S Warrington. This would help mitigate further pollution in the Warrington area as a whole by maintaining important GB land which is badly needed as our Council strives to consider and implement radical schemes to reduce respiratory and heart health harm from pernicious small 2.5 micron particulates. [REDACTED] and I am pleading with you to target significant pollution reduction. Thank you.

Yours sincerely

Liz McAloon
