Here is my objection to the local plan for Warrington.

Both the local plan and transport plan are undeliverable and unsound.

The local plan to build such a vast amount of house are unjustified we have lots of house already lying vacant that can't be sold, how will Adding another thousands of houses help i anyway,

To build on green belt is not right, we need the green belt to protect flooding, to make cleaner air. Warrington is one of the highest areas with traffic pollution we need more trees and green belt to take away the pollution not less, there are brownfield sites such should be explored first before green belt I always thought you had to explore brown field first, what about fiddlers ferry? That will be decommissioned over coming years what are the plans for this site?

Who will be living in all these houses? as there are plans to build massive commercial/distribution centres for example 565 and the stobarts application, this will increase traffic and people working here won't be living here, so this will massively make traffic worse this area is already bad for traffic as soon as the m6 has an accident WARRINGTON is total gridlock.

Our roads are under funded some unsafe due to repairs needed potholes which damage cars etc

Please consider abolishing this plan.
