I'm so dismayed to read of the proposed development known as six:56.

[REDACTED]
[REDACTED] We wanted a better quality of living for her and more green space.

What a joke.

Warrington already has one of the worst levels of air pollutions in the uk.

I know - why don't we build some more? Why don't we further pollute the air? Why don't we create more traffic in an already congested city? Why don't we eradicate some of the green space?

Erm maybe because all of the above are important assets we should be protecting.

I get it - the developers are seeing an opportunity to make lots and lots and lots of money. But what's more important than that is a communities right to protect their green space. To protect it from developers. To keep it for their children and for their children's children.

No thank you.

We don't want it.
