My husband and I strongly disagree with and object to this local plan. The predicted growth in housing isn't justified. The number of houses proposed are well over the government's housing targets and are based on old data. The proposed number of houses to be built in South Warrington will destroy village character and landscapes. Additional traffic from Langtree Six/56 will mean more noise and air pollution. Warrington already has high levels of pollution which affect people's health. The infrastructure can't support the additional volume of traffic. The roads and motorways in and around Warrington are clogged up on a daily basis and most journeys take longer than they should. Fiddlers Ferry Power Station will be closing so brownfield will be available to build houses on thereby saving the release of vital Greenbelt. This plan is not sound or deliverable and should therefore be scrapped.

Maria and Geoffrey Conterio
